Objective
Motivated and passionate programmer student seeking an internship opportunity to apply skills in Python development and data analytics.
Eager to contribute to innovative projects and gain hands-on experience in a dynamic environment.

Education
btech in data science
mar athanasious college of engineering, kothamangalam, kerala

2022-26

Relevant Coursework: python programming ,advanced data analytics proffesional certificate program by google

Skills
Programming Languages: Python,c
Frameworks/Libraries: Pandas, NumPy, OpenCV etc..
Data Analytics: Data cleaning, data visualization, machine learning basics

Experience
Intern, Python Development
Entry Elevate
april 2024-sep 2024

Built Python scripts to automate tasks, improving workflow efficiency.
Led feature development for a stress detection project, collaborating with a team.
Drove testing and debugging processes to enhance software reliability.
Learnt coding best practices and version control through peer reviews.

Projects
Stress Detector Project

Developed a system utilizing heart rate and temperature data to monitor stress levels.
Designed algorithms for analyzing physiological responses, enhancing health monitoring applications.
Data Cleaning Projects

Cleaned and transformed various datasets to improve data integrity for analysis, utilizing Python libraries for efficient data handling.

Certifications
Google Advanced Data Analytics Certificate september 2024

Extracurricular Activities
Member, Data Science Club

Organized workshops and collaborated on projects to enhance member skills.
Hackathon Participant

Participated in multiple hackathons, including the NASA Space Apps Challenge, focusing on innovative tech solutions.
